

Islamic Relief supported a total of 86,170 targeted population through WASH, Food Security & Livelihood, Cash Transfers, Health Intervention, Orphan & Child Welfare programme

- Famine is still a strong possibility from April to June of 2023 and beyond if assistance is not sustained and if the current forecasts hold true that the rains from April to June 2023 will underperform.
- Humanitarian partners have reached some 6.8 million people with life-saving assistance. But there is need to sustain and improve humanitarian aid to prevent the further loss of life and suffering.
- Together, we have averted famine, albeit temporarily. We need global solidarity to make sure that this becomes a sustained reality for the people of Somalia.
- The 2022 Somalia Humanitarian Response Plan (HRP), which seeks \$2.27 billion to meet the needs of 7.6 million people, has a shortfall of more than \$1 billion.

Community mobilization, selection and verification of Waheen market fire in Hargeisa

STAFF CORNER

Name: Ahmed Abdi Gas
Position: WaSH officer
Department: Programmes
Base location: Hargeisa, Somaliland
IRW family since: 01.11.2014

Ahmed Abdi Gas is a Wash officer at Islamic Relief based in Hargeisa, Somaliland.

I joined with Islamic Relief Somaliland Programme as a WaSH engineer on November 11th, 2014, where I started working on a large water development project named; Water Infrastructure Development in Somalia (WIDS).

I was part of the implementation team of that project while it supported hundreds of vulnerable pastorals, agro-pastoral, and urban communities. The project was really a fantastic that I will never forget its implementations. We completed the drilling of fifteen (15) boreholes out of eighteen (18).

The increased humanitarian pressing needs in Somalia as a result of multilayer disasters such as; recurring droughts, conflicts, climate shocks, disease outbreaks, and increasing of poverty which were devastating the people of Somalia and resulting in extreme water shortages, impressed me to join Islamic Relief Worldwide as a humanitarian aid worker working in the WaSH sector.

I'm a good team player humanitarian worker who likes to serve for his people with good energy and motivation. My passion is to reduce water shortage in the remote rural areas and I like to be part for any humanitarian intervention and help needy people wherever they are.

I usually begin work at 8 a.m. and leave at 4:00 p.m. in the afternoon. I always plan my daily work schedule using a "To Do list." I prioritize my daily tasks based on their urgency and work on those tasks that must be completed in the morning and the rest in the afternoon.

I am always in charge of coordinating, engaging government line ministries, monitoring and evaluating ongoing WaSH-related activities in the field. Preparing technical WaSH reports, approving completion certificates, and assisting program staff with other program activities are also part of tasks.

Protection awareness in Raar-dawo and Eyle IDP camps in Berdale Bay region, Somalia
